General information

We are pleased that you are expanding your SEMPRA with the software **Star Collection**. Our artists have collected a lot of material. The Star Collection 1 and 2 packages contain 32 styles each.

These styles are generally very universally applicable. Some of the Intros and Endings for Variation 3 and 4 are based on popular songs. Some styles have special features. For example, it is possible that in variation 1 no bass is played to have a longer Intro or in other styles a variation is used as a so-called "Bridge" (comparable to a middle part or trio in a song). Such a "Bridge" seems to take an inappropriate special position within the 4 variations at first. But if you play a suitable title, you are happy to have a suitable accompaniment for this special passage as well.

In the "Disco Fox"-like style "Howard Medley" only the Variation 4 is a triplet rhythm. If you play a Howard Carpendale medley, you can use the fourth variation for "Hello again".

When listening to the styles you will certainly notice that there is a lot of detail in the instrumentation of the Intros and Endings of Variations 3 and 4. Your SEMPRA can use separate playing parameters for Intros and Endings. This is especially interesting to emphasize certain leading elements of the arrangements only in the Intro or Ending. This is often used in the form of changes in timbre, dynamic, changes in pitch range, reverb, etc.

Installation

The styles are installed into the instrument from the USB stick belonging to your SEMPRA with the factory data.

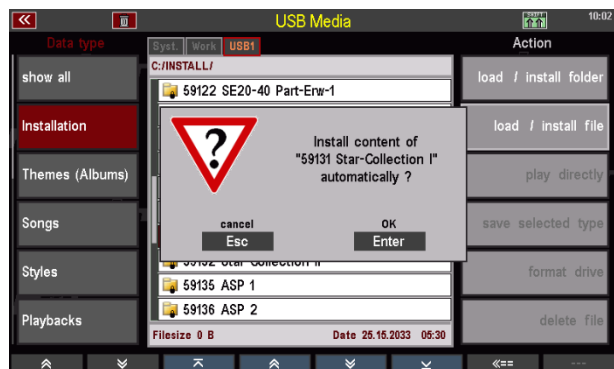

Attention: If you have received the package as an "arc" file (archive file) by email, please copy this file first on the PC into the top directory of your factory data stick (or any other USB stick, but it must be formatted on your SEMPRA). When inserting the stick into the SEMPRA the system will recognize the archive file and ask you if the archive should be unpacked. Confirm with ENTER. The installation folder for the package "Star Collection 1" will now be created on the stick (we recommend that you delete the arc-file from the stick after the installation, otherwise you will always be asked whether the file should be unpacked when you insert the stick).

You can now continue with the actual installation on the SEMPRA:

- Insert the USB stick with the installation data into one of the USB sockets of your SEMPRA.
- Press the USB button to open the USB menu in the display.
- Tap the **Installation** data type on the left (the field is shown in red).
- Move the cursor to the "**59131 Star Collection I**" folder (but do not open the folder!) using the **data-wheel** or the **cursor keys Up/Down**.
- Tap on the right on the "**Load/Install Folder**" field.

- The display asks if you really want to install the data. Confirm with **[Enter]**.
- The data will now be loaded. Afterwards you can leave the USB menu again (press **ESC** or **USB** button).
- Now the Styles are loaded (see display). After that the installation is finished. The data of the package can be used.

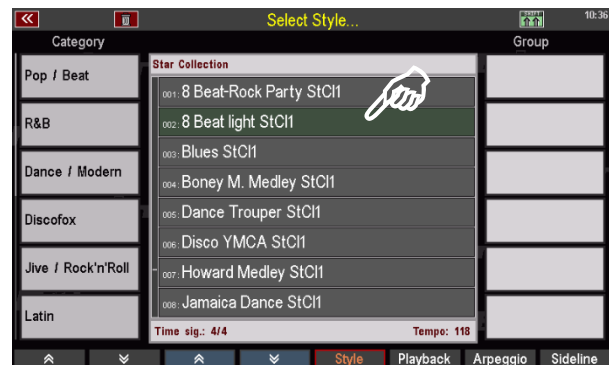

Attention: Please note that factory data, including the doo packages, are always installed on an account-specific basis. If you use additional user accounts on your SEMPRA and you want to use the Star Collection styles in these accounts, you may have to repeat the installation for these additional accounts!

Where can I find the styles?

The **Star Collection-STYLES** occupy the Firm Style Bank 14 (Star Collection). They are assigned to the corresponding categories and subgroups in the style selection.

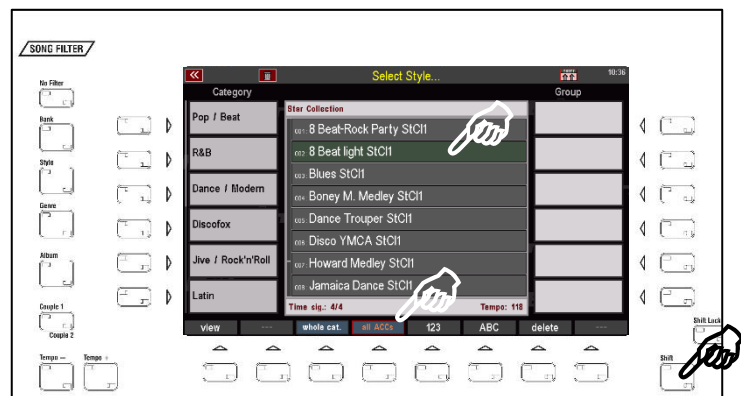

You can recognize styles of the Star Collection 1 and 2 packages by the abbreviation "**StCI1**" or "**StCI2**" after the style name.

Surely you would like to try out all styles of the **Star Collection 1** first? No problem:

Select one of the **StCI1** styles and then set the Style list in the display to "**All ACCs**".

To do this, press and hold the **[Shift]** button at the bottom right of the display to switch the **F** buttons below the display to the second function level.

Press the F button **All ACCs**. The list is now switched to the complete list sorted by style banks. If you now scroll through the list, you will see all styles of the Star Collection Bank in ascending order (in alphabetical or numerical order, depending on the selected sorting method), independent of the category or group classification.

Styles Star Collection 1 (Firm-Style-Bank 14)

bank	number	name
114	001	8 Beat-Rock Party StCl1
114	002	8 Beat light StCl1
114	003	Blues StCl1
